Amiel Somaru

Successfully completed a six week work-experience project
at Khanyisa Real Systems (Pty) Ltd

From 19th January- 27th February 2026

Alain King
Director

Lorraine Steyn
CEO

Work-Experience Project

Technical experience:

- Backend development with C# Web API (.NET 10) for a production-style purchase order system
- Data access using Dapper and stored procedures with Microsoft SQL Server hosted in Azure
- Cloud deployment to Azure Web App using GitHub Actions (CI/CD)
- Application monitoring and diagnostics using Azure Application Insights
- AI-assisted code generation with structured prompt design, followed by human review for quality, consistency and maintainability
- Test-driven development (TDD): designing and implementing automated tests throughout the development process
- Version control and team workflows: branching strategies, pull requests and collaborative code reviews
- Architecture and solution modelling using C4 modelling
- Frontend integration using the Svelte framework (after backend completion)
