

AMIEL SOMARU

Junior Software Engineer | .NET & C# Backend Specialist | Azure & SQL

Phone: 072 524 3008 • **Email:** amielsomaru@gmail.com • **Location:** Secunda, Mpumalanga, South Africa • **Languages:** English, Afrikaans
LinkedIn: linkedin.com/in/amiel-somaru-95b7412ab • **GitHub:** github.com/InfinitelyAimz • **Portfolio:** infinitelyaimz.github.io/amielsomaru

PROFESSIONAL SUMMARY

Analytical and production-focused BSc Information Technology graduate with hands-on enterprise engineering experience architecting, building, and deploying backend microservices using **C#, .NET 10, and Microsoft Azure**. Proven track record in optimizing high-performance data access via **Microsoft SQL Server and Dapper**, automating continuous integration and delivery pipelines with **GitHub Actions**, and enforcing strict architectural patterns (**C4 modelling**) and code reliability via **Test-Driven Development (TDD)**. Experienced in academic computer science instruction, high-volume IT system deployments, and enterprise remote support.

TECHNICAL COMPETENCIES

Backend & Languages:	C#, .NET 10 / ASP.NET Core Web API, Python, Java, C++, Delphi, SQL
Cloud & DevOps:	Microsoft Azure (Web Apps, Application Insights), GitHub Actions (CI/CD), Git, GitHub
Databases & Storage:	Microsoft SQL Server, Dapper ORM, Stored Procedures, Relational Data Architecture
Engineering Practices:	Test-Driven Development (TDD), C4 Software Architecture Modelling, Scrum, XP, Code Reviews
Frontend Integration:	Svelte, HTML5, CSS3
Infrastructure & Systems:	Windows 10/11 Enterprise Imaging (IPv4), Hardware Assembly, SIM Modules, Zscaler, Bomgar

SOFTWARE ENGINEERING & PROFESSIONAL EXPERIENCE

Software Development Intern • Khanyisa Real Systems (KRS)

Jan 2026 – Feb 2026

- Engineered production-grade backend RESTful services using **C# and .NET 10 Web API** for an enterprise purchase order management system.
- Architected and optimized high-performance data access layers using **Dapper** and complex stored procedures with **Microsoft SQL Server** hosted in Microsoft Azure.
- Automated build and deployment lifecycles by designing continuous integration and delivery (**CI/CD**) workflows using **GitHub Actions** targeting Azure Web Apps.
- Enforced strict software reliability and high test coverage by practicing rigorous **Test-Driven Development (TDD)**, structured pull requests, and collaborative code reviews.
- Defined and diagrammed system component boundaries and architecture utilizing the **C4 Software Modelling Framework**.
- Integrated backend endpoints with a **Svelte** frontend and monitored application health using **Azure Application Insights**.
- Leveraged strategic AI-assisted code generation through structured prompt engineering followed by systematic manual code verification and refactoring.

Student Assistant (Programming Demi) – CMPG111 • North-West University

2023 – 2025

- Mentored and evaluated over **100+ first-year computer science students** across weekly programming lectures, practical labs, and semester assessments.
- Instructed students in foundational programming logic, algorithmic problem-solving, control structures, and **Python** syntax.
- Diagnosed and resolved complex logical syntax and runtime errors in real-time within student repositories, accelerating diagnostic debugging capabilities.
- Collaborated closely with senior academic staff and professors to maintain lab environments, grade practical tasks, and ensure high curriculum delivery standards.

IT Vacation Work Intern • **Komatsu (Wadeville)**

Dec 2024 – Jan 2025

- Delivered high-volume enterprise IT infrastructure support during a scheduled multi-departmental corporate laptop upgrade and replacement lifecycle.
- Configured and deployed standardized enterprise Windows OS environments across corporate devices utilizing automated **IPv4-based network imaging**.
- Executed secure enterprise user data migrations, software installations, cloud account setups, and specialized laptop SIM card module installations.
- Remotely assisted enterprise end-users and diagnosed infrastructure issues using enterprise security and remote support tools including **Zscaler** and **Bomgar**.

IT Support Assistant – Move to Outlook (M2O) Project • **North-West University**

2022

- Supported a campus-wide digital messaging migration from legacy Novell GroupWise to Microsoft Outlook across hundreds of academic and administrative staff.
- Executed secure data migrations for archived PST databases, contacts, calendars, and active mailboxes into Microsoft 365 cloud profiles.
- Configured end-user mobile and desktop clients while providing technical troubleshooting and one-on-one user onboarding.

EDUCATION & CERTIFICATIONS

BSc in Information Technology — North-West University (Potchefstroom Campus)

2021 – 2025

National Senior Certificate (Matric) — Hoërskool Secunda

Graduated 2020

Professional Credentials:

- **KRS Work Experience Project Certificate** — Khanyisa Real Systems (2026)
- **Introduction to Cyber Security** — Simplilearn (2024)
- **Six Sigma Yellow Belt (Process Optimization)** — 6sigmastudy (2020)
- **Introducing Coding for Beginners: HTML & CSS** — BitDegree (2020)
